

Improving Gastrointestinal Endoscopy Services in Vinh Long Province, Southern Vietnam

1. **Purpose:** To establish basic training to ensure the quality of GI endoscopic service in Vinh Long Province
2. **Project Outline:** Japan Institute for Health Security (JIHS) and the Vietnam Federation for Digestive Endoscopy (VFDE) will provide training of trainers (TOT) for endoscopy professionals in Vinh Long Province. The project will also support Tra Vinh General Hospital in implementing training programs for local professionals of regional general hospitals, with the aim of strengthening diagnostic capacity and infection control in gastrointestinal endoscopy services. In addition, the project develops materials and protocols to standardize diagnosis and endoscope reprocessing through collaboration between JIHS and VFDE.
3. **Expected Outcome :**
 - ① Training will be continuously provided by training capacity building in Vinh Long province
 - ② Endoscopy service with standardized diagnosis and reprocessing will be provided.
 - ③ Professional Networks will be built through training opportunities.
