

Projects for global growth of medical technologies, system and services through human resource development in 2020

Technical training program for school health check in Cambodia (Includes relationships with other businesses)

(1) In FY2019, under the cooperation of Cambodia MoEYS and MoH, we conducted a school health examination with a local school health room, Kagawa University model, and confirmed the implementation style of the school health examination in Japan. Here, the method of policy formulation and phased implementation in Cambodia will be clarified.

- (2) Conduct education and researcher training for Westline School managers who develop a school health checkup model with the government officials of (1) and public health nursing, and school health sciences.
- (3) Support the roadmap of the comprehensive Japanese-style school health room system such as the implementation status of school health checkups and the "health text" developed by the JICA project and transferred to the Cambodian government, and the hygiene education scheme.
