

Project for Human Resource Development of Cambodian Rehabilitation specialists in NCDs

- **Improving knowledge and skills of physical therapy/rehabilitation professionals is essential** in Cambodia since cost of social security has increased by 5times because of expanding **NCDs** due to economic and medical growth over the past quarter century.
- Last year, we had shared about plans of the University **①Rise Clinical Skills ②Effective Educational Methods ③ToT of practice** for rehabilitation treatment and prevention in **Maternal and Child health, Pediatric Developmental Disorder, and the Elderly**. For this, also we were requested for cooperation to start graduate education and improve research and clinical quality within 5 years.
- For contributing through **①implementing ToT(other than the capital city) ②Clinical skills in CPD ③Introducing effective educational methods** collaborating with Ministries, University, Professional bodies, Higher education institutions and companies.

*Implemented in the project 2019

Implementation method

①ToT training program

Supporting companies, Publisher, Manufacturing, Movie makers.

Eg:e-learning, treatment/measurement equipment including amount of physical activity, various equipment related companies for PT practice and education

Cooperation

Japanese Physical Therapy Association (Tokyo)

Cooperation

②Improvement of clinical skills

Medical institution to which those involves belong

③Effective educational methods

Higher education institutions to which those involves belong.

*Master's programs, simulation education

Professional
Webinar
